Fast becoming the most recognised treatment available for improving your skin without the need for ablative lasers or harsh chemical peels. CIT therapy creates micro-channels in the skin to awaken fibroblast cells where brand new collagen is naturally produced. We all want lots of collagen. Collagen production starts to slow after the age of 25. This means a weakening and thinning of the skin. Recommended for treating fine lines, pigmentation, acne, enlarged pores, scarring, uneven skin texture, uneven skin tone. Please speak to one of our therapists before booking this appointment.
